PROPORTIONAL VALVE TESTER PVT-2

description

- In-line electrical monitor for proportional hydraulic valves with on-board electronics
- Designed to monitor those voltages which can affect the control of proportional hydraulic valves in a hydraulic system
- Configured for industry standard proportional valves (Bosch, Rexroth) operating on 24VDC, a ± 10 VDC command signal

features

- In-line proportional valve tester uses system power
- Tests proportional valves with On-Board Electronics (OBE)
- Limited capability for external drive valves
- Jog forward and reverse
- External command of valves or monitor while in use
- Monitors supply voltage, LVDT feedback and command voltages
- Optional carry-case available
